CAREBRIDGE REGIONAL HEALTH SYSTEM · OUTPATIENT DIAGNOSTIC LABORATORY
CLIA Certificate: #99D0876543 | Medical Director: Arthur Miller, MD, FCAP
==========

PATIENT DEMOGRAPHICS & ENCOUNTER DATA:
Patient Name: Elena Rodriguez DOB: 1985-06-22 (Age: 41) Sex: Female
Patient ID: PT-847291 Encounter Date: 2026-10-14 Fasting: 12 Hours
Ordering Physician: Dr. Sarah Jenkins, MD (Family Medicine)

COMPREHENSIVE METABOLIC PANEL (SERUM):

Analyte	Result	Reference Interval	Units	Clinical Flag
Fasting Blood Glucose	104	70 - 99	mg/dL	BORDERLINE HIGH
Blood Urea Nitrogen (BUN)	16	7 - 20	mg/dL	NORMAL
Serum Creatinine	0.9	0.6 - 1.3	mg/dL	NORMAL
eGFR (CKD-EPI)	>60	>60	mL/min	NORMAL
Serum Sodium	140	136 - 145	mmol/L	NORMAL
Serum Potassium	4.3	3.5 - 5.1	mmol/L	NORMAL
Serum Chloride	102	98 - 107	mmol/L	NORMAL
Carbon Dioxide (CO2)	25	22 - 29	mmol/L	NORMAL
Serum Calcium	9.4	8.6 - 10.2	mg/dL	NORMAL
Total Bilirubin	0.7	0.2 - 1.2	mg/dL	NORMAL
Aspartate Transferase (AST)	22	10 - 40	U/L	NORMAL
Alanine Transferase (ALT)	28	7 - 56	U/L	NORMAL

CAREBRIDGE REGIONAL HEALTH SYSTEM · OUTPATIENT DIAGNOSTIC LABORATORY
Patient: Elena Rodriguez | ID: PT-847291 | Specimen Date: 2026-10-14
==========

LIPID PROFILE EVALUATION (FASTING SERUM):

Analyte	Result	Target Range	Units	Clinical Flag
Total Cholesterol	194	< 200	mg/dL	NORMAL
Triglycerides	142	< 150	mg/dL	NORMAL
HDL Cholesterol	52	> 40	mg/dL	DESIRABLE
LDL Cholesterol (Calc)	114	< 100	mg/dL	BORDERLINE ELEVATED

ORDERING CLINICIAN DIRECTIVES & ACTION PLAN:
1. Fasting blood glucose is mildly elevated at 104 mg/dL. Repeat fasting blood glucose and perform screening HbA1c in 3 months.
2. Mild LDL elevation (114 mg/dL). Initiate Mediterranean dietary pattern with reduced saturated fats and maintain 30 minutes of aerobic physical activity daily.
3. Continue existing daily multivitamin. No prescription medications required at present.
4. Follow-up clinic appointment scheduled with Dr. Sarah Jenkins on January 15, 2027 at 10:00 AM at the Outpatient Health Pavilion.
